

World Class  
**AQUA HEALTHCARE**  
Products

**PHOENIX**<sup>®</sup>  
PHOENIX HC INNOVATIONS

We care for  
Animal Health & Wellness

**Why Choose Us:**

At Phoenix Healthcare Group, we understand your relentless pursuit of quality products and services to cater to the evolving needs of your customers. As your reliable partner, we offer a comprehensive portfolio adhering to industry standards.

**Why we stand out:**

**Diverse Portfolio:** With direct associations with leading manufacturers across India and globally, Phoenix Healthcare Group offers a unique range of single and multipurpose hospital disposables and surgical consumables, ensuring comprehensive medical solutions.

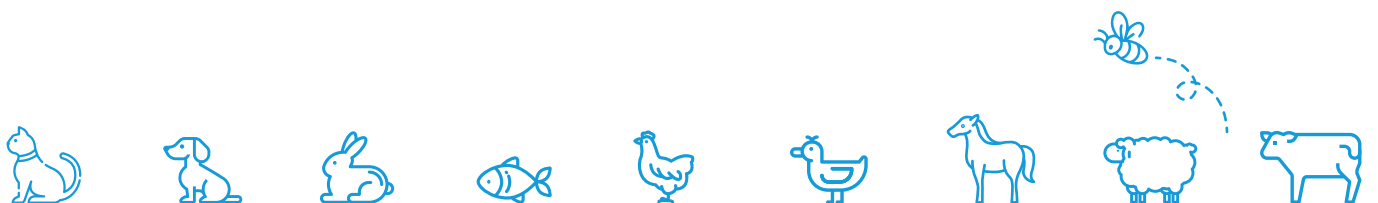

**Expanding Horizons:** We are not limited to medical device and surgical disposables. Phoenix Healthcare Group has been actively involved in the distribution of animal feed, supplements, veterinary needs, nutraceuticals, and disinfectants. We cater to the following sector Bovine, Caprine, Ovine, Canine, Feline, Equine, Camel, Poultry, Aquaculture, Apiculture.

**Global Reach:** We are committed to expanding our product lines worldwide and establishing fruitful partnerships with distributors, channel partners, and stakeholders in respective territories. Our unwavering commitment enables us to not only meet but exceed customer expectations.

**Who We Are:**

Established in 1998 officially at Abu Dhabi, United Arab Emirates, Phoenix Healthcare Group initially began as a distribution house with import and export activities. Over the past two decades, we've diversified and carved a niche for ourselves in the distribution of: Orthopaedic Surgical devices & disposables / hospital consumables / Animal feed & supplements, Veterinary surgical supplies / Veterinary Medicines / veterinary Diagnostics Elisa & Rapid kits / Speciality Disinfectants for farms / Insecticides for farms and Public Health / Veterinary accessories / Poultry farm specialities.

Our journey has been characterized by continuous growth and adaptation. Today we are a multi-national operators Equipped with a robust infrastructure and a well-established sales and marketing distribution network, we've embraced a culture of dedication and optimism in serving our clientele. At Phoenix Healthcare Group, we remain committed to meeting and exceeding customer needs with every endeavour.

W e c a r e f o r A n i m a l H e a l t h & W e l l n e s s

## I-PRO

### Composition :

**I-PRO** is a special Probiotic in combination with selective strains of multi beneficial bacteria & Enzymes.

**Primary Benefit :** Helps for better health, immunity, more growth & body weight

### Benefits :

- Prawn & Fish becomes Fresh & Healthy
- Helps to Reduce the pathogenic bacterial loads .
- Helps to Reduce ammonia, nitrite, nitrate, H<sub>2</sub>S and other toxic gases
- Helps to Reduce stress to the animals.
- Develops healthy planktonic bloom.(Natural Food)

## ICON-PS

### Composition :

Biological liquid preparation from special selective sps of Probiotics (PSB) in suitable proportions.

**Primary Benefit :** Helps for better growth, body weights and immunity

### Benefits :

- Decomposes suspended organic waste in pond water.
- Reduces levels of H<sub>2</sub>S, ammonia and other toxic gases
- Disintegrate organic waste in pond bottom
- Develops desire water coloration and blooms.
- improves pond environment & makes pollution free.

## BIO-BRIDGE

### Combination :

In combination of selective multi probiotics and Enzymes for pond bottom improver and sludge reducer properties.

**Primary Benefit :** Helps for better survival, more body weight, high yields.

### Benefits :

- Decomposes the high organic material very quickly in pond bottom.
- Reduces the bottom sludge and improve the soil quality
- Inhabits the growth of bacteria in bottom sediments.
- Reduces the toxic and harmful gases like.. ammonia ,

## ICO- YEAST

### Composition :

**ICO -YEAST** consists the pure and specially grown Yeast culture (**Saccharomyces boulardii**) for aquaculture use. It is a natural Food to Aquatic animals.

### Benefits :

- Helps for better health condition .
- Improves the level of production, low FCR
- Increases efficiency in the use of feed ingredients.
- Reduces all kinds of stress factors.
- Prevents diseases by pathogens.
- Increases the plankton levels.(Natural Food)
- Improves the growth , immunity and survivals.
- Acts as probiotic and decomposes organic matters

## AQUA PROBIOTIC

### Dosage:

#### In Water :

2.5 kg / one hectare (Ha) pond water in 2-3 weeks intervals. (or) as advised by an aqua consultant.

**In Feed :** 10 grams / kg of Feed 7-10 days in a month.

**Presentation :** 1 kg Pouch

## LIQUID PROBIOTIC FOR AQUACULTURE

- Inhibits the growth of harmful bacteria.
- Prevents infectious diseases.

### Dosage:

**In Pond water :** 5 lit / one acre pond water in 2-3 weeks intervals (or) as advised by an aqua consultant.

### Note:

**apply during sunlight period ( 09.00 am – 11.00 am)**

**Presentation :** 1 lit, 5 lit, 20 ltr

## SPECIAL AQUA PROBIOTIC

- nitrite and H<sub>2</sub>S level in pond water.
- Promotes for better water quality and pollution free environment.
- Effectively in wide range of different water parameters.

### Dosage:

**In Water :** 5.0-10 kg / one hectare (Ha) pond water in 2-3 weeks intervals. (or) as advised by an aqua consultant.

**Presentation :** 5 kg, 10 kg Bucket

## YEAST (NUTRIENT) SUPPLEMENT

- Improves water and soil quality.

### Dosage :

**In the Ponds:** 2.5 kg/ one hectare (Ha) water area / 2-3 weeks intervals.

**In Feed:** 5 gm / kg of feed /3-4 days in a week regularly (or) as per the advice of an aqua consultant.

**Presentation:** 1 kg Pouch

# I LACT

**Composition :** Each kg. contains ...  
Multi probiotic of Lacto bacillus, Saccharomyces cerevisiae with enzymes, seaweed extracts, vitamins, trace minerals etc.

**Benefits :**

- Limits the activity of pathogenic bacteria in gut.
- Maintains a healthy and balanced gut micro flora.
- Improves the overall performance of Shrimps/Fish
- Reduces digestive upsets & Improves FCR
- Promotes the fast growth rate & increases Immunity.
- Prevents white gut and white feces diseases in shrimps.
- Regulates proper moult cycles in shrimps.

# ICOMIN

**Composition:**  
**ICOMIN** is a highly specialized formulation with chelated mineral compound in a suitable proportions including major minerals and minor minerals.

**Primary Benefit :** Promotes better growth rate ,more body weights & high immunity in shrimp / fish.

**Benefits:**

- Provides require essential minerals in the water & shrimp / fish body.
- Helps for better muscle formation in shrimp/ fish
- Develops stable algal bloom with enough phytoplankton.

# ICOMIN-SPECIAL

**Composition:**  
**ICOMIN-SPECIAL** is prepared with highly selective chelated minerals Calcium, Phosphorus, Zinc, Cobalt, Selenium, Molybdenum, Manganese, Magnesium, Copper, Ferrous etc. in ideal proportions (feed grade).

**Benefits:**

- Helps for better growth & exoskeleton development
- Prevents shell problems like loose shell, soft shell, body cramps etc .
- Helps for growth of high quality phytoplankton .
- Stimulate and regulates the periodic moulting process of shrimps
- Increases growth and survivals in shrimps

# I-CRAMP

**Composition:**  
**I-CRAMP** is a preparation of special macro and micro chelated mineral compounds in a suitable proportions.

**Benefits:**

- I-CRAMP can absorb into the shrimp body immediately.
- Prevents the body cramp and white muscle in shrimp.
- Makes the pond water rich with essential minerals in ionic form.
- Enhances the Bio Mineralization process in water.
- Prevents problems like loose shell, soft shell etc. of shrimps.
- Attains better muscle strength & shell formation.

## ALL ROUND GUT HEALTH PERFORMER & GROWTH PROMOTOR IN AQUACULTURE

- Controls mortality & improves survivability.
- Acts as best binder for feed additives along with pellet feed.

**Dosage :**

**Regular use :**  
5-10 gm / kg. of pellets 4 days in a week regularly.

**During Stress / Gut Disease Condition :**  
10-20 gms / kg. of pellets for 10 days. (or) as per the advice of an aqua consultant.

**Presentation :** 500 gm, 1 kg tins

## SPECIAL MINERAL SUPPLEMENT FOR AQUACULTURE

- Prevents diseases like... loose shell , soft shell, body cramp, white muscle etc. in shrimps.
- Regulates proper moult cycle in shrimp.
- Prevents mineral or nutritional deficiency diseases.

**Dosage:**

**In Feed:** 10 gm. / kg. of feed 4 days continuously in a week regularly

**In water:** 25 kg / one Hectare pond water / once in 15 days intervals (or) as advised by an aqua consultant.

**Presentation :** 10 kg Bag

## HIGHLY QUALITY MINERAL SUPPLEMENT FOR AQUACULTURE

- Enhances immunity and disease resistances of body.
- Better coloration and pigmentation of body.
- More active and stress free.

**Dosage:**

**In Feed:** 5 gm. / kg. of feed 4 days continuously in a week regularly

**In water:** 25 kg / one Hectare pond water / once in 15 days intervals (or) as advised by an aqua consultant.

**Presentation :** 10 kg Bucket

## SPECIAL MINERAL SUPPLEMENT FOR PREVENTION OF BODY CRAMP & GROWTH PROMOTION

- Formation Helps for better growth rate & body weights Less chances of diseases.

**Dosage:**

**In Feed:** 5 gm. / kg. of feed 3 days continuously in a week regularly

**In water:** 25 kg / one Hectare pond water / once in 15 days intervals (or) as advised by an aqua consultant.

**Presentation :** 10 kg Bag

# ZEOCON

## Composition:

**ZEOCON** contains the natural aqua grade zeolite with Probiotics in granule form.

## Primary Benefits:

Helps for Healthy growth of Shrimp & Fish.

## Benefits:

- Helps for toxic gas adsorption
- Reduces levels of harmful lethal elements
- Ensures for water & soil quality improvement
- Acts as deodorizing agent & buffering agent
- Breaks down organic wastes
- Helps in growth of phytoplankton

# PRO-HERB

## Composition :

Contains concentrated extracts of Yucca Schidigera, selected Probiotics (nitrifying and denitrifying bacteria) and fortified with bio active compounds in suitable proportions for reducing ammonia level from pond water

**Primary Benefit :** Makes the animal Fresh, Healthy and for Better Growths.

## Benefits :

- Adsorbs toxic gases like Ammonia, hydrogen sulphide, sulphurdioxide etc.
- Relieves from stress very fast.
- Increases appetite and helps for low FCR.

# OXYCON

## Composition:

Calcium Oxide & Sodium and Other Compounds.

## Primary Benefit :

Provides Quick relaxation from stress to the Aquatic Animals.

## Benefits:

- Releases quickly dissolved oxygen in pond water
- Enhances the total DO levels in water
- Provides relaxation from stress
- Prevents low DO depletion and mass mortalities

# SOFT ON

## Composition:

**SOFT ON** is a mixture of Grade -I **Ethylene diamine tetraacetic acid** (EDTA) and Hydrated Sodium Aluminium Silicate(Zeolite) in suitable proportion.

**Primary Benefits :** Helps for better Moulting and growth

## Benefits:

- Helps to reduce excess hardness of the pond water.
- Helps to reduce excess alkalinity of the pond water.
- Helps to reduce excess iron and other toxic metals in the pond.
- Helps to reduce water turbidity.
- Helps to reduce toxic gases

## A NATURAL MULTI MINERALS(ZEOLITE)WITH PROBIOTIC FOR AQUACULTURE

- Helps for better survivals, growth and production.

## Dosage:

**In Water :** 10-20 kg / one hectare(Ha) pond water in 2-3 weeks intervals (or) as advised by an aqua consultant.

**In Feed :** 2 kg / Ton of feed as growth Promotes

**Presentation :** 10 kg & 20 kg Bags.

## FOR BETTER POND FRESHNESS & HEALTH PERFORMER

- Helps for better growth and survivals

## Dosage :

**In Pond water:** 2.0- 2.5 kg/ one hectare (Ha) pond water / once in 2-3 weeks intervals (or) as advised by an aqua consultant.

**In Feed :** 5-10 gm / kg of Feed 5-7 days in a month (or) as advised by an aqua consultant.

**Presentation :** 500 gm, 1 kg tins

## DO DEVELOPER & STRESS RELIEVER

## Dosages:

**Apply in Pond Water :**

**Normal conditions :** 2.5 kg / one hectare pond water / 2-3 weeks intervals

**During oxygen depletion condition:** 5.0 kg / one hectare pond water / repeat 2-3 times continuously in a week . (or) as advised by an Aqua consultant.

**Presentation:** 1 kg, 5 kg Bucket

## HIGH PERFORMANCE WATER SOFTENER CUM GAS ADSORBENT FOR AQUACULTURE PONDS

- Helps to maintain optimum DO levels in the pond.
- Best alternative for bore water aquaculture
- Helps for better health performances, immunity, growth, body weights, gut functions, productivity, Increases appetite, digestion, feeding etc

## Dosage:

**In Water :** 5-10 kg / one Hectare (Ha) pond water in 2-3 weeks intervals. (or) as advised by an aqua consultant.

**Presentation :** 1 kg, 5 kg Pouches

# I PLANK-AQUA

## Composition :

**I PLANK-AQUA** is a highly specialized formulation with natural minerals and micro nutrients added with natural plankton booster.

## Benefits :

- Develops phytoplankton bloom( Natural Food)
- Helps for generation of Zooplankton
- Supplies natural food to culture species
- Stabilizes the whole pond ecosystem
- Helps to Increase DO level
- Helps to Reduce toxic substances
- Regulates pond temperatures
- Maintains water quality.

# I TURB

## Composition :

**I TURB** contains in combination of multi synergetic compounds for turbidity reducer and pond performances inducer.

## Primary Benefits :

Prawn eats the food freely and gets enough Nutrients, Growth & Body weight.

## Benefits :

- Reduces turbidity of pond water.
- Maintains optimum transparency of water.
- Increases phytoplankton (Natural Prevents gills chokes and diseases)
- Reduces sludge level in pond bottom.

# I-GROW

## Composition :

**I-GROW** is a highly specialized formula with multi vitamins, minerals, amino acids, enzymes, fortified with lactobacillus sps of beneficial bacteria (feed grade).

## MAJOR BENEFITS

**1.Strong health 2.Strong immunity 3.Better & faster growth 4.More body weight 5.Less Bacterial Diseases**

## Benefits :

- Covers the vitamin deficiencies and avoids related symptoms and lesions
- Covers the mineral deficiencies and avoids related symptoms and lesions
- Helps for better growth, body weight with better

# I FISH

## Composition :

**I FISH** contains Minerals, Vitamins, Amino acids .Growth promoter and Herbal powder with anti microbial properties in suitable proportion.

## MAJOR BENEFITS

**1. Strong health 2. Strong immunity 3. Better and faster growth 4. More body weight 5. Less Bacterial Diseases**

## Benefits :

- Promotes fast growth and gains more body weight.
- Enhances immunity of fishes against diseases.
- Minimizes disease occurrences of fishes.
- Regulates normal physiological and metabolic

## A NATURAL PLANKTON BOOSTER FOR AQUACULTURE

- Helps for better growth, more survivals, low FCR, & high productivity.

## Dosages:

**In Water :** 10-20 kg / one Hectare (Ha) pond water in 2-3 weeks intervals. (or) as advised by an aqua consultant.

## Note:

**apply during sunlight period ( 09.00 am – 11.00 am)**

**In Feed :** 10-20 gms / Kg of Feed as a growth promotes for 7-10 days in a month (Or) as advised by an aqua consultant.

**Presentation :** 5 kg,10 kg Bags

## WATER TURBIDITY REDUCER & POND PERFORMANCE ENHANCER

- Promotes better survivals, yields, growth & body weights.

## Dosages : In Pond water

**Regular :** 2.5 – 5.0 kg / one Hectare (Ha) pond water / 2-3 weeks intervals.

**In High Turbidity / Sludge Condition:** Repeat dosages for 1 or 2 times in 4-5 days intervals.(or) as per advice of an aqua consultant.

**Presentation :** 1 kg Pouch

## GROWTH PROMOTER & BODY WEIGHT ENHANCER FOR SHRIMP / FISH

- health & immunity
- Feeds utilized effectively by better digestion, absorption and assimilation of nutrients
- Gut becomes healthy and conditioned
- Prevents growth of pathogenic bacteria in the gut
- Culture period reduced and more profits with

## Dosage :

### Regular Use :

5 gm./Kg. of feed / 3-4 days in a week regularly

### Periodical Use :

10 gm. /Kg. of feed / 7 days

continuously. (or) as advised by your aqua consultant.

**Presentation :** 1 kg Tin

## A SPECIAL NUTRITION FOR GROWTH PROMOTION AND DISEASE PREVENTER IN FISHES OF CAGE CULTURE

- activities.
- Increases appetite and digestion.
- Lower the FCR and feed cost.
- Better survivals and more harvest.
- Prevents bacterial, viral, fungal and protozoan diseases in fishes like ulceration, red diseases, columnarities, , fin rot, gill rot, tail rot.

## Dosage :

10-20 gm / kg of feed regularly (or) as per advised by Aqua consultant .(or) as advised by your aqua consultant.

**Presentation :** 1 kg Tin

# PUNGA-SPECIAL

## Composition :

Contains the selective essential nutrients along with vitamins, minerals, amino acids, enzymes, growth promoters, liver stimulants, herbal extracts etc in suitable proportions

## Benefits:

- Covers Vitamin and mineral deficiencies.
- Helps for better growth and body weights.
- Increases survivals and production.
- More appetite and optimum FCR
- Less diseases infection & out break
- Enhances immunity of Fish body.

# I VIT AQUA

## Composition:

**I VIT AQUA** is a mixture of the vitamins A,C & E along with other vitamins & minerals including B1, B2, B6 & B12.

## Product Action :

**Vitamins A and E** are both involved in helping the body resist infection.

**Vitamin A** is essential for healthy mucous membranes such as the mouth, gills and gut.

**Vitamin E** has been shown to boost the immune mechanism in some species.

**Vitamin C** is used up very quickly by the body when it is under stress and so must be replaced.

Growing fish can become severely and permanently deformed due to vitamin deficiencies.

## A SPECIAL FEED PREMIX FOR ALL ROUND HEALTH PERFORMANCES IN PUNGASIOUS FISHES

## Dosage:

5-10 gm / kg of feed regularly (or) as per advised by Aqua consultant

**Presentation :** 1 kg Tin

## A SPECIAL VITAMIN FEED SUPPLEMENT

B Complex Vitamins helps to reduce routine stress.

## Benefits:

- Enhances Immunity & less chances of diseases
- Helps for better digestion with low FCR
- Enhances more body weights
- Increases muscle strength.
- Promotes better all round health performances.

## Dosage :

**Regular use :** 2-3 gm. / one kg feed / continuously. (or) as advised by an aqua consultant

**Presentation :** 1 kg Tin

# CRACKOUT

## Composition :

1 kg contains  
Vitamin C : 10%  
Acid citric : 10%  
Vitamin E : 5%  
Herbal Extracts : 200 gm  
Carrier (antioxidant, anticaking & dextrose) :Q.S

**Primary Benefit :** Boosts Immunity & Strength

## Benefits:

- Prevents Head Crack diseases
- Promotes new formation of cells in skull.
- Helps to prevent injuries and stops bleeding
- Saves cat fishes from mortalities.

## FOR CARE OF HEAD CRACK PROBLEMS

- Promotes better health condition
- Prevent and reduce stress of cat fish
- Enhance disease resistance
- Increase growth rate
- Increase survival rate
- Inhibit infectious bacterial diseases

## Dosage :

**Regular use :** 5-10 gm. / one kg feed / for 10 days continuously. (or) as advised by an aqua consultant.

**Presentation :** 1 kg Tin

# I LIV AQUA

## LIVER JUNDICE/ YELLOW LIVER / WHITE LIVER/FATTY LIVER

## Composition :

Contains ....  
Vitamin B1, Vitamin B2, Vitamin C, Vitamin B6, Methionine, Sorbitol, Folic acid, Betaglugans, Glycine, Iron, Copper, Selenium, & Herbal extracts in suitable proportion.

## SYMPTOMS :

Yellow color of the skin & gills. Loss of appetite, Lethargic & weak body, Anorexic and moribund. Gill rot, Enlarged and a pale-yellow color of liver, spleen, kidney and gall bladder. Yellow ascetic fluid Yellow coloration of fat tissues in the abdominal cavity.

## LIVER STIMULANT & DIGESTANT

## Benefits:

- Prevents diseases of Yellow liver / Liver jaundice, white liver, fatty liver in fishes
- Protects to liver from toxins
- Helps for better FCR, more growth rate & survivals.

## Dosage:

5-10 ml / kg of feed regularly for 10 days (or) as per advised by Aqua consultant

**Presentation :** 1, 5 liters

# IMMO CARE AQUA

**Composition :** 1 kg contains:

- Mannan Oligosaccharides 50,000 mg
- Beta Glucan 1,3 – 1,6 50,000 mg
- Live yeast 1010 CFU
- Vitamin E 25,000 mg
- Choline chloride 1000 mg
- Carrier qs. 1 kg

**Benefits:**

- Nourishes and stimulates the immune system
- Prevents diseases from early stages of shrimps
- Enhances disease resistance.
- Increases fast growth and better survival rate
- Improves feed conversion ratio (FCR)

# WHITE CON

**Composition :**

In combination of special probiotics, trace minerals, phytobiotic compounds, vitamins & immune-stimulants in suitable proportion.

**Benefits :**

- Prevents white gut, white feces Suppresses the growth of vibrio in intestinal track
- Prevents various gut diseases & ensures healthy gut
- Optimizes FCR and increases appetite.
- Stimulates periodical molting and resolves soft-shelled problem
- Enhances immunity
- Promotes fast growth with uniform sizes

# HERB-ACT

**Composition :** Each ltr contains following special herbs:

Piper nigrum  
Azadirachta indica  
Taraxacum officinale  
Eucalyptus robusta  
Eucalyptus globulus  
Aloe vera  
Syzygium aromaticum  
Berberis vulgaris

**Benefits:**

- Herbal supplement highly recommended to improve pond water quality.
- Helps to make pond environment healthy to promote

# PONDMIN-LIQUID (SHRIMP & FISH) LIQUID MINERAL SUPPLEMENT FOR AQUACULTURE

**Composition :**

Contains highly specialized feed grade minerals in liquid form.

**Benefits:**

- Provides enough mineral strength in the pond water and to the animals
- Prevents mineral deficiencies
- Prevents & controls loose shell, soft shell problems
- Initiates moulting process quickly
- Prevents the body / muscle cramps of the animals
- Increases plankton growths in pond water
- Helps for better growth, better health, better immunity.

## FOR IMMUNITY ENHANCER & DISEASE PREVENTER IN SHRIMP /FISHES

- Prevents and reduces stress.
- Promotes better harvest.

**Dosage:**

5-10 gm / kg of feed regularly (or) as per advised by Aqua consultant

**Presentation :** 1 kg Tin

## WHITE GUT PREVENTER IN SHRIMP

- Increases Survivals and better production.

**Dosages:**

**Regular Use :** 5-10 ml / one kg of feed 3-4 days in a week regularly

**White Gut Disease / Poor feeding :** 10-20 ml/ one kg of feed for 1-2 weeks continuously. (or) as advised by an aqua consultant.

**Presentation :** 1 lit, 5 ltr

## HERBAL SUPPLEMENT FOR AQUACULTURE POND WATER

- growth & body weight gain in shrimp & fish.
- It helps to minimize pathogenic population in pond water.
- Acts effectively on all debris & waste material present in the pond water & prevents from the various infections to the shrimps / fish.
- Helps to prevent & minimizes external infections of aquatic animals.

**Dosage:** Add in pond water:

Routine use : 1 to 2 ltr/ acre use once in two weeks.

In severe conditions : double the above dosage (or) as advised by an aqua consultant.

**Presentation:** 5 ltrs & 20 ltrs.

**Dosage:**

**In Pond Water:**

General use : 4 litres / acre once in 15 days.

During problems like loose shell, soft shell, poor moulting, poor growths, less plankton etc.: 5-10 litres /acre

**In Feed:**

5-10 ml. / kg. of feed continuously

(or) as advised by an aqua consultant.

**Presentation:** 5 Lit. & 20 Lit.

## IMMUN-BOOST (SHRIMP) SPECIAL IMMUNE BOOSTER FOR SHRIMPS

### Composition :

Beta carotenes  
Amino acids (L-lysine & DL methionine)  
Fatty acids  
Vitamins A, D3, E, C & B12  
Mineral's zinc, cobalt, manganese & selenium  
Probiotics lactobacillus & saccharomyces cerevisiae.

### Benefits:

- Supplies important nutrients to improve immune-strength of the shrimp / prawn.
- Maintains & improves optimum health and body growth.
- Build-up better body defense mechanism.

- Helps the animal to relieve from stress.
- Increases feed intake, feed digestion & body weights.
- Prevents the colonization of bacterial pathogens in the gut.
- Improves survivals of aquatic animals.

### Dosage:

Shrimp feed:  
Regular use : 5 gm/ kg of pellets.  
During stressful conditions : 10 gm/ kg. of pellets.  
(or) as advised by an Aqua consultant/Technician.

**Presentation :** 1 Lit, 5 Lit.

## AMMOFIX-DS (SHRIMP & FISH) SPECIAL PROBIOTIC FOR NITRIFICATION IN AQUACULTURE PONDS

### Composition :

It contains special selected aqua-probiotics

### Benefits :

- Highly useful to make healthy environment in aquatic pond
- Eliminates un-ionised ammonia at the pond bottom, also prevents further ammonia production.
- Reduces and eliminates off-flavour and ammonia problem effectively.
- Breakdown of organic waste material & sludge in pond water.
- Improves water quality.
- Effective even at relatively high BOD/COD.
- Increases DO level & reduces pH level.

- Increases disease resistance power of the host
- Less susceptibility to diseases and infections.
- Improves survival rate.
- Improves growth, body weight & FCR

**Dosages:** 1 Meter water depth / One Hectare area.

Types of Species	During pond preparation (kgs)	During pond culture (kgs)	Frequency
P.monodon (Tiger shrimp)	2.0	1.0	weeks
L.vannamel shrimp	2.0	1.0	weeks
Scampi/Fish	1.0	0.5	month

**Presentation :** 1 kg. Pouch

## ORGA-GUT (SHRIMP)

### Composition :

Formulation of special highly concentrated organic compounds (Feed grade)

### Benefits :

- Helps in correct digestive functions
- Makes gut healthy and optimum functional
- Prevents White Gut, White feces and White Muscle very effectively.
- Acts as a growth promoter and immuno modulator
- Improves body weight
- Increases DO level & reduces pH level.

## WHITE GUT PREVENTER & DIGESTANT FOR SHRIMP

### Dosages:

**In Feed:**  
5-10 ml / kg of feed 2 days every week  
(or) 10 days every month (or)  
as per advice of an aqua consultant.

**Presentation :** 500 ml., 1 ltr., 5 ltr.

## FOR-SHELL (SHRIMP)

### Composition :

Each 100 ml contains (feed grade).

Phosphate : 2000 mg.  
Vitamin D3 : 2000 I.U.  
Vitamin B1 : 10 mg.  
Vitamin B2 : 5 mg.  
Vitamin B12 : 10 mcg.  
Vitamin C : 500 mg.  
Ferrous gluconate : 100 mg.  
Zinc sulphate : 20 mg.

### Benefits :

- Provides important nutrients for build up shrimp shells and Skelton

## MOULT INDUCER & LOOSE SHELL PREVENTER

- Prevents loose shell disease in shrimp
- Helps in quick formation of shell.
- Acts as growth promoter in fish & shrimp

### Dosages:

**In Feed:**  
20 - 30 ml. / kg. of pellets for 7 days in a month  
(or) as advised by an aqua consultant

**Presentation :** 1 lit, 5 Lit & 20 Lit

## PRO-GUT-PLUS (SHRIMP & FISH) PROBIOTICS WITH NUTRIENTS - GEL FORM

### Composition :

Special preparation of Dried Bacillus subtilis in gel form (Feed grade)

### Benefits :

- Maintains and improves a healthy & balanced gut micro flora.
- Arrests the activity of harmful pathogenic bacteria in the gut.
- Improves the overall performance of shrimps.
- Reduces digestive upsets and problems.
- Improves digestive functions and feed utilization
- Promotes the fast growth rate of shrimp.
- Improves FCR.
- Helps in to reduce stress & improves immune power

- Improves survivability.
- Acts as a best feed binder for pellet feeds

### Dosage:

#### In Feed:

10 - 20 ml / kg of shrimp feed (or) as per advice of an aqua consultant.

### Application:

Mix recommended quantity of PRO-GUT-PLUS and apply to 1 kg of pellet feed. Dry the feed under cool shade for 30 minutes before feeding.

**Presentation :** 1 lit, 5 lit

## GUT-CARE (SHRIMP)

### Composition :

Preparation of special selective herbs in suitable proportions fortified with Special nutrients (feed grade).

### Benefits :

- Helps to activate functions of hepato-pancreas.
- Improves gut health and its digestive functions
- Prevents and controls digestive disorders
- Helps to prevent white gut disease in shrimps.
- Helps for fast growth and more body weights.

## WHITE GUT PREVENTER & CONTROLLER

### Dosages:

Regular Use : 5 gm/kg of pellets.

During white gut infection :10-20 gm / kg of pellets (or) as per the need (or) as advised by an aqua consultant..

**Presentation :** 500 gm., 1 kg. Tins

## GROW-BOOSTER (SHRIMP & FISH) GROWTH PROMOTER & BODY WEIGHT ENHANCER

**Composition :** Specialized formula with multivitamins, minerals, amino acids, enzymes, fortified with lactobacillus sps. (feed grade)

### Components per kg:

<b>Vitamins:</b>	Cobalt : 100mg	Alpha Galactosidase : 1000mg
Vitamin A : 1,00,000IU	Iron : 2500mg	Beta Galactosidase : 1000mg
Vitamin D3 : 20,000IU	Selenium : 10mg	<b>Amino acids:</b>
Vitamin E : 1000mg	Calcium : 5000mg	L - lysine : 2500mg
Vitamin C : 2000mg	<b>Enzymes:</b>	DL- Methionine : 2500mg
Vitamin B1 : 1250mg	Amylase : 1250mg	<b>Probiotics:</b>
<b>Minerals:</b>	Protease : 1250mg	Lacto bacillus lactis : QS
Zinc : 2000mg	Lipase : 1000mg	Lacto bacillus acidophilus : QS
Manganese: 2500mg	Cellulase : 1000mg	

### Benefits:

- Provides all important nutrients to animal body, to improve growth & performance.
- Covers the vitamin deficiencies and avoids related symptoms and lesions
- Covers the mineral deficiencies and avoids related symptoms and lesions

- Helps for better growth, body weight with better health & immunity
- Improve gut health and its functions
- Improves feed digestion and utilization, also improves nutrients absorption.
- Improves disease resistance power and helps in to minimize infections and diseases.

### Dosages:

Shrimp feed:

Regular use : 5 gm / kg of pellets

Periodical use : 10 gm/ kg of pellets for 2 days every week.

(or) as advised by an aqua consultant.

**Method of application:** Take recommended quantity of "GROW-BOOSTER", and mix with feed.

**Presentation:** 500 gm., 1 kg. Tins

## ICO-TOXNIL (SHRIMP & FISH) TOXIC GAS ADSORBENT & STRESS RELIEVER

### Composition :

Preparation of concentrated HSCAS, fortified with probiotics (feed grade).

### Benefits:

- Absorbs toxic gases like Ammonia, hydrogen sulphide, sulphur dioxide etc.
- Acts quickly and absorbs toxic gasses completely.
- Animals relieved from stress quickly.
- Reduces turbidity of pond water and improve water quality.
- Makes healthy atmosphere in pond water to aquatic animals
- Improves growth of phytoplankton, which is a natural

food of aquatic animals, it helps to improves growth and performance.

### Dosage:

Black Tiger Prawn (*P. monodon*) : 500 gm /acre

Vannamei Shrimp culture : 1 kg / acre

Fish Culture : 500 gm /acre

(or) as advised by an aqua consultant.

**Presentation:** 1 Kg. Tin

## ASTO-XANTH

### Composition :

Natural Asta-xanthene, Betaine, HUFA, vitamins, minerals, Amino acids, Enzymes etc.

### Benefits :

- Improves colour & appearance.
- Improves health & immunity.
- Helps for more survivals.
- Helps for better growth & body weights.

### Dosage:

2 Gm. per kg. of pellets at least twice in a week or as advised by an aqua consultant

## PHYTO-CARE

### Composition :

Pure herbal formulation prepared with selective herbs having multi beneficial functional properties.

### Benefits :

- Having strong microbicidal & immuno modulating properties, to prevent & control various-bacteria, virus, protozoa and fungi.
- Increases immunity and provides protection against all kinds of diseases.
- Effectively prevents known and unknown infections / diseases in aquaculture.
- Helps to improve appetite and digestion which helps for better growth and health

## SHRIMP-GAIN

### Composition :

Each kg contains: Colostrum Powder, Bacillus subtilis, Phyllanthus emblica.

### Benefits:

- Nutritional preparation especially for Vannamei & Tiger shrimp culture to improve profitability.
- Acts as a super food for shrimps & prawns, it supplies high nutritional supplements in initial stages of their life, which helps to achieve more weight gain in short period of time.
- It provides natural amino acids, anti-oxidants, vitamins and minerals. Also, it contains important Insulin like growth factors IGF-1 & IGF-2, which encourages growth of muscles and tissues in shrimps.

## ICO-RID (Fish)

### COMPOSITION:

It is a special preparation prepared from special selective herbs fortified with minerals having the properties as flukicide and digestant.

### BENEFITS:

- Prevents the internal / external worm & fluke infestations.
- Helps the fish to digest better and to utilize nutrients completely.
- Fish become active and healthy.

## SPECIAL PREPARATION OF ASTAXANTHIN

### Application:

Take recommended quantity "ASTO-XANTH" and mix with suitable feed binder

**Presentation :** 100 gm., 200 gm.,500 gm. Tin

## IMMUNO MODULATOR, DISEASE PREVENTOR AND GROWTH PROMOTER

- Very effective against white gut disease.

### Dosages:

#### In Feed:

- As a regular growth promoter, disease preventor & immunomodulator: 2 gm/kg of feed for 2 days in every week from the beginning to till harvesting.
- During disease out breaks, poor growths and non-specific mortality: 5-10 gm/kg of feed 7-10 days continuously.

**In Water:** 1 kg / hectare once in 2-3 weeks (or) as advised by an Aqua consultant.

**Presentation :** 500 gm tin

## NUTRITIONAL SUPPLEMENT FOR RAPID GROWTH

- It has an important immune properties like antibodies, immunoglobulins and enzymes, which improves immunity & resistance power in aquatic animals.
- It helps to strengthen the digestive system & prevents digestive disorders.

### Dosages: Add in feed:

Shrimps & Prawns:

1<sup>st</sup> week: 10 gm/kg of feed    2<sup>nd</sup> week: 6 gm/kg of feed  
3<sup>rd</sup> week: 4 gm/kg of feed    4<sup>th</sup> week: 3 gm/kg of feed  
5<sup>th</sup> week onwards : 2 gm/kg of feed 2 days every week (or) as advised by an aqua consultant.

**Presentation :** 1 kg tin.

## WORM PREVENTER & GROWTH PROMOTER

### DOSAGE :

Use in Feed : 50 gms. / ton of biomass, continuously for 5 days and repeat the dose once in 3-4 weeks(or) as advised by an aquaculture consultant.

### APPLICATION:

Mix recommended quantity in feed & use after few minutes

**PRESENTATION:** 1 kg., 5 kg.

## I BENZ -80

**Composition :** Contains.....

Alkyl Dimethyl Benzyl Ammonium Chloride : 80%  
Stabilizers, Activators & excipients : q.s.

**Benefits :**

- Having broad spectrum antimicrobial activity , treats bacterial (high load of Vibrio), protozoan & fungal infections in aquaculture.
- Effectively controls antenna rot, tail rot, gill rot, red gill, black spot, red discoloration and muscle necrosis in Prawn and Shrimp.
- Controls infections due to bacteria & parasitic in fish.
- Uses as a prophylactic treatment of surface ulcers, wounds and lesions in fish culture.
- Helps to initiate molting activity in shrimp & prawn.

## I PHOR-10

**Composition :** contains.....

**Alkyl aryl polyoxyethylene iodine complex** with buffering and emulsifying agents.

**I PHOR -10** is a proven new generation iodine available in a complex and buffered form.

**I PHOR -10** releases iodine in a controlled manner when it is diluted in water.

**I PHOR -10** is nontoxic, non-irritating, and non-staining to the shrimp/ fish.

**I PHOR -10** helps to improve growth, body weight , and survivals .

**Benefits :**

- Cures all external infections caused by harmful pathogens like bacteria, protozoa & fungi.

## I-BRO-5

**Composition :** Contains.....

Bromide : 5%w/v,  
Stabilisers : Q.S.

**Benefits :**

- Prevents the formation of fungus bed in the pond water and pond bottom.
- Prevents all the infections of body surface, gills, appendages, antennae, tail etc.
- Very safe, economical, less irritant and so does not cause stress to aquatic animals.
- Prevents all bacterial , fungal and parasitic diseases caused by pathogenic microorganisms.
- Minimizes microbial load in pond water.

## TRICON

**Composition :**

- Potassium monosulphate compound: 49.8 %  
Contains triple salt....
  - ✓ Potassium monopersulphate
  - ✓ Potassium hydrogen sulphate
  - ✓ Potassium sulphate
- Sodium Dichloroisocyanurate:5%
- Excipients : Q.S.

**Benefits :**

- TRICON cures all bacterial diseases like Vibriosis in shrimps / fishes.
- It controls the diseases like rot diseases, black gill, tail rot, black and red patches, etc. in shrimps
- It is highly effective against viral diseases like.. WSSV,

## A BOARD SPECTRUM DISINFECTANT AND SANITIZER FOR AQUACULTURE PONDS

- Reduces contaminated suspended organic matters, germs, protozoa, fungi, bacteria, virus etc. & makes the pond water clean & healthy for the aquatic animals.
- Helps to improves survivals, growth & body weight gain of aquatic animals

**Dosage:**

Preventive Use : 2.5 lit / one hectare (Ha) pond water / 2-3 weeks intervals.

Treatment Use : 1 lit - 2.0 lit / one acre pond water / 1-2 weeks intervals. (or) as advised by an aqua consultant.

**Presentation :** 1 lit , 5 lit

## A PROVEN DISINFECTANT FOR EXTERNAL INFECTIONS & DISEASES PREVENTER IN AQUACULTURE

- Effectively controls diseases by.... Bacteria like Pseudomonas spps., Vibrio spps., Aeromonas spps., etc., Fungal pathogens like Fusarium, Lagenedium, Pythium etc., & Protozoans like Zoothamnium, Vorticella etc.
- Provides healthy environment to the aquatic animals & protects from secondary infections.

**Dosage:**

Preventive Use : 500 ml / one acre pond water / 2-3 weeks intervals.

Treatment Use : 1 lit / one acre pond water / 1-2 weeks Interval (or) as advised by an aqua consultant.

**Presentation :** 500 ml, 1 ltr

## DISEASE PREVENTER & WATER QUALITY IMPROVER

- Controls and kills all harmful algae and excess green bloom in pond water.
- Eliminates off flavour from pond water.
- Helps for better growth and more survivals

**Dosage:**

Preventive Use :

2 lit / one acre pond water / 2-3 weeks intervals.

Treatment Use :

4.0 lit / one acre pond water / 1-2 weeks intervals.

(or) as advised by an aqua consultant.

**Presentation :** 1 lit , 5 ltr

## A PROVEN DISINFECTANT FOR VIRAL & BACTERIAL DISEASE PREVENTER IN AQUACULTURE

- TSV & EMS diseases in Vannamei shrimps.
- It prevents and controls luminescence bacteria (LB) & lighting effect in shrimp culture ponds.
- It cures all external parasitic infections of shrimp/fish.
- It helps to remove off flavor from the pond water.
- It helps for better growth and survival of aquatic animals.

**Dosage:**

**\*Preventive Use :** 500 gm / one acre pond water / 2-3 weeks intervals.

**\*Treatment Use :** 1 kg / one acre pond water / 1-2 weeks intervals.(or) as advised by an aqua consultant.

**Presentation :** 1 kg Tin

## ICO-LICE (Fish)

### COMPOSITION:

It is a special herbal preparation fortified with minerals having functional properties as anti LICE agent and digestant.

### BENEFITS:

- Prevents the infestation caused by Fish lice, Ierena, Anchor worm etc.
- Helps for better digestion
- Helps for more growth or higher survivals
- Improves in FCR

## LICE PREVENTER & GROWTH PROMOTER

### DOSAGE :

Use in Feed :  
100 gms. / ton of biomass continuously for 5 days  
(or) as advised by an aqua consultant.

### APPLICATION:

Mix recommended quantity in feed & use after few minutes.

**PRESENTATION:** 1 kg, 5 kg.

## I-CAL MAG (SHRIMP)

**COMPOSITION:** Nutritional formula contains Calcium and Magnesium with other minerals.

### BENEFITS:

- It supplies important minerals like calcium and magnesium and make the balance in shrimp & pond water
- It improves growth, exoskeleton and body weight
- Prevents mineral deficiency effectively in pond water
- Prevents body cramp, soft shell, loose shell etc. in shrimps
- Helps in to regularizes the moulting process
- Increases alkalinity of pH at desired level in pond water

## CALCIUM AND MAGNESIUM NUTRITIONAL SUPPLEMENT FOR SHRIMPS

- Improves survival rate and profitability in shrimp farming

### DOSAGE:

In Pond Water :  
20 kg / one acre / 1 to 2 weeks intervals  
In Feed:  
2 gm/ kg of feed continuously for 3 to 4 days in every week (or) as advised by an aqua consultant.

**APPLICATION:** Broadcast all over the pond uniformly.

**PRESENTATION:** 25 kg.

## METACON-W

### COMPOSITION:

It contains selective potential proprietary probiotic strains which is microbiologically derived fermented liquid.

Strains like- *Lactobacillus acidophilus*, *Lactococcus lactis*, *Lactobacillus rhamnosus*, *Lactobacillus reuteri*, *Bacillus licheniformis*, *Bacillus coagulans*, *Bacillus subtilis* etc.

### BENEFITS:

- "METACON-W" is a biological product developed with advance metabolite-technology.
- It is effective against White Feces Syndrome (WFS), White Muscle Disease (WMD), White Gut Disease (WGD), Running Mortality Syndrome (RMS) etc. in shrimp culture
- It acts as a substitute for antibiotics/chemicals in shrimp and fish farming can be used in all diseases management.
- It can effectively arrest growth and proliferation of many aquaculture pathogens of aquatic animal gut as well as in pond water like *Vibrio* sp., *Aeromonas*

## INNOVATIVE BIOLOGICAL SOLUTION FOR SHRIMP & FISH DISEASE MANAGEMENT

- sp., *Staphylococcus* sp., *Yersinia* sp., *Edwardsiella* sp., *Arcobacter* sp., *Salmonella* sp. Coliforms and other fungal pathogens etc.
- It is a pure biological substance helps for better FCR, health & growth
- It helps to produce healthy crop with high yields in shrimp farming
- It helps the animal speedy recovery from infections also it improves feed consumption and its utilization that helps animal for normal growth and weight gain even after infections.
- It improves ecosystem of pond and provides healthy and stress-free atmosphere for aquatic animals

### DOSAGE:

In pond water : 2 Ltr per 01 Acre for 3 to 5 days  
In feed : 10 ml / 01 Kg. feed for 3 to 5 days  
(Or) as advised by an aqua consultant

**PRESENTATION:** 5 Ltr, 10 Ltr, 20 Ltr.
